

# CLASSIC FASTENERS

Obsolete fastener specialist

*CLASSIC FASTENERS* was established circa 1988 to supply 'obsolete' and just plain hard to get fasteners to restorers of automobiles and motorcycles via a mail order service. The business changed hands in November 1998 and is now based in Adelaide, owned and run by the Milne family.

- All prices in this catalogue include GST.
- Our ABN is 68 056 601 532

*Derek & Leanne Milne*

# April 2024 Catalogue

## TERMS AND CONDITIONS OF SALE

- ORDERS** Orders can be placed via our Online store, Telephone, Post or E-mail,
- PAYMENT** Payment is accepted by Visa, MasterCard, Direct Deposit.
- PACKING and POSTAGE** Postage and packing charges for orders delivered in Australia are as follows
- |   |      |
|---|------|
| Flat Rate Standard Australia Post with tracking | \$11 |
| Express Post                                    | \$15 |
- Overseas orders by quotation via our web site.
- PRICES** Every attempt will be made to hold the prices to those shown in this catalogue, but we reserve the right to alter or amend prices at any time without prior notice.
- TAXES** All prices include 10% GST.  
Overseas customers deduct 1/11<sup>th</sup> from the prices listed
- DELIVERY** All effort will be made to dispatch orders within five working days of receipt. If we cannot do so (for example an item is temporarily out of stock) we will contact you, quoting a delivery date. If this date is unacceptable, a refund may be obtained any time prior to dispatch.

### *Risk Free Guarantee*

If you are not fully satisfied with any of our products, return it to us within 60 days and we will happily offer you the following options:

- 1) A replacement
- 2) A full refund on the product

**1/4" BSCY vs 1/4" BSF**

1/4" BSF is interchangeable with 1/4" BSCy. Both have 26 tpi, the difference being BSF has a 55 degree thread angle and BSCy has a 60 degree thread angle.

# BSCY (CEI, Cycle, 26tpi)

Length is measured from under the head.

Set screws are threaded all the way to the head; bolts are partially threaded.

		2	Set screw	\$15.60			

# Metric (Coarse) - Stainless

Length is measured from under the head.

## IMPORTANT - PLEASE READ

Metric bolts in M4, M5, M6, M7 and M8 diameters are generally suitable for both European and Japanese cars and motorcycles. However, M10 in the standard 1.50 pitch and M12 1.75 pitch are only suitable as replacements on European machines. They will not fit Japanese vehicles which use a 1.25 pitch fine thread.

## Pan Head, JIS (Phillips)

Smaller head diameter screws than ISO/DIN standard screws.

As used on many Japanese designed goods.

Often designated (but not always as that would be too easy) with an dot next to the cross drive on the head.

The use of JIS compatible screwdrivers is recommended—a standard Phillips screwdriver bottoms out before the flanks engage correctly leading to damaged screw heads.

## Standard Hex Nuts - Steel - Metric

M10 1.50mm pitch and M12 1.75mm are not normally used on Japanese motorcycles. Use 1.25mm fine pitch.

Standard M10 nuts and bolts have a 17mm spanner size, the Japanese often use a smaller 14mm hex size, so please check there is sufficient clearance for the standard size hex before ordering.

0	BA	25.4	\$0.30	\$23.00	

## Standard Hex Nuts - Steel - BSCY (CEI)

BSCY thread is used on many English motorbikes and bicycles from circa 1900 through to the 1960's.

Satin chrome has an appearance similar to cadmium plate with greater durability than zinc plate.

BSCY (CEI)		Standard Nuts		ZINC plated		STAINLESS 304	CHROME
		tpi	AF	Each	per 50	Each	Each
<b>1/4</b>	BSF	26	0.445"	<b>USE 1/4 BSF</b>

## Cage Nuts - Weld Type

Also referred to as "floating nut retainers". The design allows the nut to "float" within the steel cage, which is ideal for hole misalignment and blind assembly.

# Wood Screws

## COUNTERSUNK - Slotted

### SOLID BODY, CUT THREAD

Length is measured from top of head.

**Brass:** highly corrosion resistant, relatively soft

**Silicon Bronze:** Is often preferred over stainless 304/316 in wooden boat construction and re-fastening due to its superior corrosion resistance, and over brass due to its higher strength. Bronze is similar to copper in colour and is sometimes seen in fine woodworking where it is used for its appearance.

22	0.028	0.71

# Copper Nails

## COPPER SHEATHING NAILS

### SOLID COPPER

Clout type nail round plain shank

English Standard Wire Gauge (SWG)

Traditionally used to secure copper sheathing (thin copper sheet) onto the hulls of timber boats to reduce marine growth and attack by wood worm.

SKU	Gauge		Length	each		per 100	Approx. Number of nails per 100g
	SWG	Metric					
CNS1258	12G	2.64mm	16mm	\$	0.17	\$ 12.00	105
CNS1234			19mm	\$	0.21	\$ 15.00	87
CNS1178	11G	2.94mm	22mm	\$	0.19	\$ 13.50	68
CNS111			25mm	\$	0.33	\$ 23.00	58

## Copper Square Shank "Boat" Nails

### SOLID COPPER

#### FLAT HEAD

Square shank copper nails are often used for timber boat manufacture and repair. They can be used by themselves in the standard fashion, clenched or conjunction with a copper roves to create a riveted joint.

Gauge		Head Dia mm	Length	each	
SWG	Metric				
12G	2.64mm	6.4mm	50mm	\$	0.41
			65mm	\$	0.51
			75mm	\$	0.61
11G	2.94mm		50mm	\$	0.45
10G	3.25mm		50mm	\$	0.58

## Copper Roves

Copper Roves are a small dished washer used in conjunction with boat nails to create a riveted joint. The rove should have a hole slightly smaller than the nail being used . It is driven onto the nail, the nail clipped to length and then peened over to create a secure fastening.

Looking for a rove setting tool? I suggest that you try a bit of dowel or metal rod, drill a hole in one end to fit the nail and then countersink to create a dish shape.

Size		per each	per 50	per 100
Outside diameter	suits nail size			
10mm	14 gauge	\$ 0.13		\$ 9.00
11mm	12 gauge	\$ 0.20		\$ 14.00
13mm	10/11 gauge	\$ 0.35		\$ 25.00
16mm	8 gauge	\$ 0.51		\$ 36.00
19mm	6 gauge	\$ 1.15	\$ 40.42	

# TENAX - "made in England"

The original "Tenax" fastener, made in England, available in non-rustable nickel plated brass.

English made Tenax are NOT interchangeable with the German made variety.

How to tell the difference?

The upper part (button) on the English version is stamped "made in England".

The peg of the English version is acorn shaped whereas the peg of the German type is spherical.

	Part No	Description	Price Each	Per 50
	31	Standard Button	\$5.55	\$194.25
	302	Button Lock Nut - standard dished type	\$1.05	\$36.75

	34	Locking Key	\$1.00	

## LOXX (TENAX) - "made in Germany"

LOXX® is a secure fastening solution that is lockable, easily detachable and prevents accidental opening. It is regarded as particularly child-safe and senior-friendly.

Developed more than 80 years ago to fasten soft-tops on convertibles, the LOXX® fastener (the original German fastener) has been used in many fields including the automotive industry, boat accessories, consumer goods, fashion, music and the automation industry.

Since 1928, the company Schaeffer, today the Schaeffertec GmbH, is the only German manufacturer of this ingenious fixing system.

It is a German product for customers who set value on quality and sustainability - not only for the sake of the environment.

There are copies, of course, but the original is and always will be LOXX® - Made in Germany!

## BSA A7/A10 RGS B31 Sump Plate Studs (Set of 4)

Set of 4 Sump Plate Studs to suit BSA A7/A10 RGS, B31, Gold Star

1/4 BSF 26 tpi thread one end, 1/4 BSW the other.

Length = 7/8"

Steel, bright zinc plated.

Per Set of 4

**\$14.00**

## BSA A7/A10 ROCKER COVER NUTS

1/4" BSF sleeve nuts to suit BSA A7/A10's.

Overall length 0.44"/11.2mm

Zinc plated steel.

**Zinc**

Each

Set of 8

**\$18.00**

## BSA A7/A10 RGS Rocker Cover Studs (Set of 8)

Set of 8 Rocker Cover Studs to suit BSA A7/A10 RGS.

1/4 BSCY 26 tpi thread one end, 1/4 BSW the other.

Length = 1"

Steel, bright zinc plated.

Per Set of 8

**\$26.00**

## BSA A10 Thick Flange cylinder Barrel Studs (Set of 9)

Bright Zinc plated.

Original BSA Part No 67-1214

Specifically for BSA A10

5/16 BSCY thread one side and 5/16 BSW the other.

Studs are 1.445" long

Made in England

Set of 9

**\$20.00**

## BSA

**BSA CHAIN ADJUSTER BOLT SET**

Original style 5/16 BSCY x 2" wheel adjuster bolts with reduced head size and matching locknuts. Suitable for BSA A & B group and B31-A10 swing arm models.

Available in zinc plated steel and stainless steel.

The stainless set screws have a slightly domed head

BSA Part No 42-6040

	<b>Zinc</b>	<b>Stainless</b>
<b>Set of 2</b>	\$10.00	\$35.00

**BSA CARBURETTOR DRIP TRAY**

**\$45**

To suit BSA A7/10 Auto Advance models only.

Made from stainless steel, laser cut and highly polished upper surface

OEM part number 67-0120

The holes are spaced 25mm apart, centre to centre. The two smaller holes are 8.5mm diameter and the larger hole is 30mm diameter.

**BSA HANDLE BAR CLAMP BOLTS**

Stainless steel 5/16 BSCY bolts manufactured on 1/4"BS hex size (smaller hex than normal 5/16 BSCY bolts). The head of these bolts is slightly domed.

Set includes 4 bolts/set screws and 4 flat washers

<b>Thread</b>	<b>Length</b>	<b>Fully threaded</b>	<b>Price per set</b>
5/16 - 26 BSCY	1"	Yes	\$33
5/16 - 26 BSCY	1 1/8"	No	\$33

## Jaguar

XK rocker cover and cylinder  
head dome nuts and washers

**To suit:**

Jaguar XK120, XK140 and XK150 (1949-61) • Mark I (1955-59) • Mark II (1959-69) • E-Type Series 1 and 2 (1961-70) • Mk5 (1948-51) • Mk7, Mk8 and Mk9 (1950-61) • Mk10 (1961-66) • 420G (1966-69) • S-Type 3.4 and 3.8 (1963-68) • 420 and Daimler Sovereign (1966-69) • XJ6 Series I (1968-72) • Daimler DS420 Limousine and Hearse (1968-72)

SKU				per each
Cam Cover Dome Nut - Chrome	1/4 - 28 UNF	0.63" High		\$4.05
Copper Washer	1/4" bolt size			\$0.20
Head Nut, Domed - Chrome	7/16 - 20 UNF			\$8.00
D - Washer - Chrome	7/16" bolt size			\$6.85
Thick Round Washer - Chrome	7/16" bolt size			\$6.35

# Genuine Lucas & Girling

We supply Genuine Lucas Motorcycle Parts that includes the Girling brake and shock absorber range.

A Lucas/Girling catalogue is available to download from our website [www.classicfasteners.com.au/downloads/](http://www.classicfasteners.com.au/downloads/)

Our stocked items can be located on our online store.  
Other items can be ordered.

# Lucas

## LUCAS WIPER BOX NUT 5/8—26 TPI

Description	Wiper Hex Nut. Six sided nuts were fitted to many Lucas windshield wiper boxes
Lucas part No.	153511
BMC part No.	37H6316
Material	Stainless steel

\$5.60

To suit Lucas Wiper Boxes as fitted to the below vehicles

- Austin Healey BN2 BN4 BN6 BN7 BT7 BJ7 BJ8
- Austin Healey Sprite MKI MKII
- MINI Cooper MKI MKII 998cc 1959-1968
- MGA 1500 1600 1600 MKII
- MGB 1962-1963 to roadster to (c)6916
- Midget MKI MKII
- Triumph TR3 from TS12568 TR4 TR4A
- Triumph TR250 1968

## LUCAS HEADLAMP RIM SCREW

To suit Lucas motorcycle headlamps

Mushroom Head Slot Screw 2BA x 5/8 stainless steel

\$3.55

## HANDLE BAR CLAMP BOLTS

Stainless steel 5/16 UNF bolts with slightly domed head..  
High quality handlebar clamp bolt to suit many Triumph models T120, T140, T150, T160, TR6, TR7 etc

OEM Part No 21-0589

Thread	AF	Length	Thread length	Each
5/16 - 24 UNF	1/2"	1 1/8"	7/8"	\$8.50

**RUBBER CABLE TIES**

Original Style grey rubber cable ties, as used on British motorcycles. Ideal for holding cables and wiring to frame tubes etc.  
These ties have a nominal un-stretched length of 112mm.

Grey Rubber Cable Tie	\$1.50
Pack of 10 Rubber Cable Ties	\$13.50

## Rivet Nuts

Rivet Nuts, also known as nutserts, and rivnuts are a female threaded nut used in sheet metal and composite material. Installed from one side to create a permanent and reusable thread.

Rivet Nuts are easy to install using tools similar to that used for pop rivets. Simply place the fastener into a pre-drilled or punched hole, and when pulling up, using the installation tool, you will see how the Rivet Nuts body expands, compresses, and locks into place. Rivet Nuts are ideal when the material is too thin or brittle to support a bolt on its own.

Note: If installing only one to two nuts it is possible to get away with using a setscrew, nut and washer to compress the Rivet Nut.

## Thread Gauges

Identify the thread on that mystery bolt. Measure its diameter and then using a thread gauge measure it's thread pitch. Compare this information to our thread chart to determine what thread your bolt or screw is. Thread chart available upon request and supplied with every thread gauge.

**Whitworth 55°** \$19.90  
(Marked in threads per inch)

**Metric 60°** \$19.90  
(Thread pitch marked in millimetres)

**Unified National 60°** \$22.60  
(Marked in threads per inch)

## EZI Sizer Gauge

For measuring gauge and length of wood, self tapping, metal thread screws, bolts, wall plugs and drill sizes. \$10.00

## Clutch Locking Tools

These tools lock the clutch drum and the centre together for easy tightening or removal of the clutch centre nut. Laser cut. Some minor filing to fit to your clutch basket may be required..

## Thread Insert Tools

**“Power Coil”** thread repair kits are a simple way to repair stripped or damaged threads and are ideal in alloys and other light materials. In most cases the repair is stronger than the original. Many thread types and sizes are available. Listed below are some of the more popular kits.

We sell Bordo's PowerCoil & ProThread kits and parts.

PowerCoil is for industrial use and covers a full range of diameters and pitch. **All STI taps included in PowerCoil kits are HSS.** ProThread is suited to the automotive aftermarket, and covers only a limited range of diameters and pitch. **STI taps in ProThread kits are carbon (chrome alloy) steel.** For reference a carbon steel tap has 1/10 the life of an HSS tap.

Each kit includes a high speed steel tap, 1.5D long inserts (length equals 1 1/2 times the diameter), insertion tool, tapping drill and instructions.

Please contact us for product information and prices of other sizes in the range.

## Taps, Dies & Drills

We source a wide variety of taps, dies and die nuts, from the most common to the most unusual. Listed below are some of the more popular sizes. A variety of tap and die sets are also available. Prices on request.

All the Taps and Dies that we supply are of the finest quality.

All taps listed are available in 3 forms

- ♦ **Taper** Gradual taper used for starting new threads.
- ♦ **Intermediate** Less tapered, used to follow a Taper tap or for restoring threads.
- ♦ **Bottoming** Very little taper, so will cut thread to the bottom of a blind hole, but the lack of taper makes starting a new thread more difficult.

For general workshop use we would recommend the use of an Intermediate tap, and unless otherwise specified, this is what we will supply.

## TAP WRENCHES

These are of high quality, normally Bordo or Goliath brand.

### "T" Type Tap Wrenches

No.	Size range	Price
1/4 "T" Type	1/8" to 1/4"	\$39.00
1/2 "T" Type	1/4" to 1/2"	\$61.00

### Bar Type Tap Wrenches

No.	Tap Size range	Price
00	1/16" to 1/4"	\$74.00
0	1/16" to 3/8"	\$74.00
5	3/16" to 1/2"	\$86.00
6	1/4" to 3/4"	\$109.00

## DIE STOCKS

These are of high quality, normally Sutton, Bordo or Goliath brands.

For 13/16" diameter dies	\$33.00
For 1 1/2" diameter dies	\$66.00
For 2" diameter dies	\$90.00

## GOLIATH PREMIUM QUALITY DIE STOCK

For 1" diameter dies	\$32.00
----------------------	---------

# How To Identify Thread Types

Identifying the thread of a bolt or screw is quite easy.

To identify a bolt or screw you need to know

1. the diameter of the bolt
2. the number of threads per inch (or pitch) on the bolt

These results are compared to information on a thread chart to identify the thread type (available from our web site).

## Measuring the diameter of a bolt or screw.

This is best done with a micrometer or vernier. If you do not have access to this equipment careful measurement using a steel rule will be fine for sizes 1/4" and up.

## Measuring the threads per inch (or pitch)

Metric threads are measured by their pitch. That is the distance from the crest of one thread to the crest of the next, measured in millimetres.

The pitch of a metric thread can be checked by direct measurement with a metric rule.

Imperial threads have their pitch measured indirectly as a given number of teeth per inch.

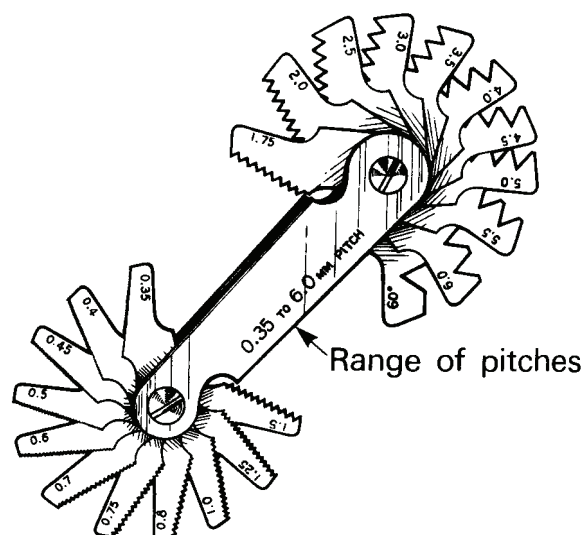

- Use a steel rule to find the pitch or teeth per inch of a thread
- Place a rule along the thread, parallel to its axis.
- Line up the crest of one tooth with a major division
- Count the number of teeth to match a whole number of divisions

Calculate the number of threads per inch

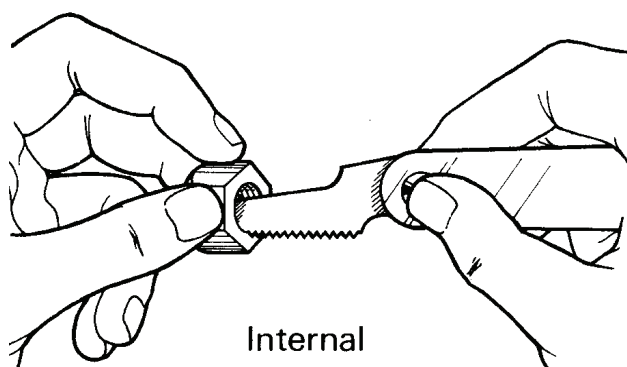

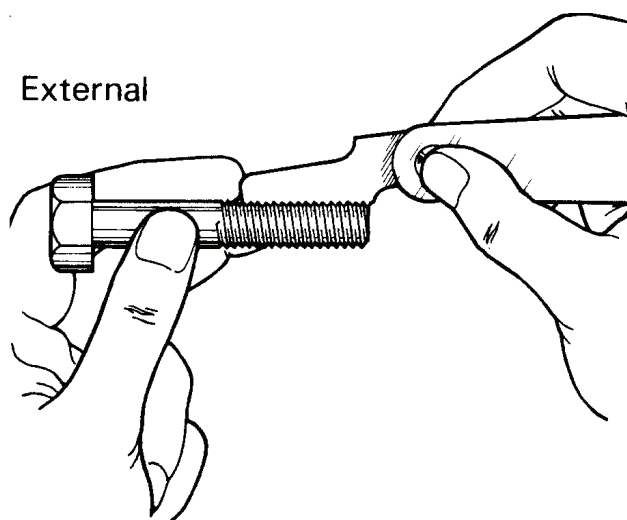

A much easier and more accurate way to identify the pitch of a bolt is to use a thread gauge (also known as a screw pitch gauge). These gauges consist of a steel case with a number of folding leaves at each end. Each leaf has teeth of a particular pitch, and is marked for reference.

Using the bolt pitch and diameter, compare this to the information on thread charts to identify the thread type.

Thread charts available from our web site.
